## **ABERDEEN HISTORY**

The Aberdeen Stud has been breeding Dorset Sheep for 77 years. The Stud was founded with a Dorset Horn background in 1940 by HC Yates and Sons. In 1975 the stud purchased the entire "Parack" Stud Flock No. 788 and transferred top Dorset Horn ewes from their Horn Stud.

In 2006, Aberdeen Poll Dorset Stud had a new direction under its new location and management. We endeavour to keep breeding sires of true characteristics. Some of these traits involve extremely high growth rate, plenty of style, robustness, clean points and focus on good length of carcass to produce a higher yielding lamb. Now with Lambplan, we can give independently measured figures for birth weight, growth rate, fat cover and eye muscle. Our figures are a highlight and so are the rams.

Aberdeen is still very commercially orientated with clean faces, finer fronts for lambing ease and plenty of body for weight gain. As owners we have a passion to take the Aberdeen Stud to meet our high expectations and goals to promote the Stud to the highest level achievable. Aberdeen will continue to work on meeting the needs of its clients and will purchase sires from other leading studs which have genetically outstanding lambplan figures.

## MEMO OF SIRES REPRESENTED IN THIS CATALOGUE

**Aberdeen 9-15** Son of Gloroy's White Caviar.

**Aberdeen 30-15** Very Solid Ram. Sold well at last year's sale.

**Aberdeen 91-15** Fantastic looking Ram. A son of Aberdeen 16-12. Sold at last year's sale.
