55th ANNUAL

RAM SALE

Flock No. 788

Brucellosis Accredited
OJD Vaccinated MNV-2

166 STUD AND FLOCK RAMS

Inspection from 11.30am
Lunch and light refreshments provided.

3% REBATE FOR OUTSIDE AGENTS IN ATTENDANCE

On Property "Marabou" Henty NSW, Tuesday 8th October 2019 at 1.30pm

55th ANNUAL ABERDEEN POLL DORSET SALE

Sale Offerings 16 Elite Stud Rams 150 Special Rams 20 Flock Rams (not catalogued)

Enquiries: Simon and Melissa Male ABN: 46 997 082 389
 "Marabou", Henty, NSW, 2658
 Ph: 02 6929 3376 Mobile: 0427 293 376

Aberdeen Stud is Brucellosis accredited free, enrolled in the Market Assurance Program and accredited with a MN2 status. Marabou is a foot rot free property.

LAMBPLAN figures are available on all stock on Sale Day. LAMBPLAN ASBV's for all Rams are from Terminal 01/09/2019. Accuracies can now be found in this catalogue and on the Lambplan website. All Rams weights were taken on 9/9/2019. All Stud Rams are waiting on Genomic testing results.

Insurance: Insurance cover will be available on the day of sale. **(Please note, if delivery of rams is required, insurance is strongly recommended as purchased rams awaiting delivery post sale will be run as one mob together. It is purchasers risk, not Aberdeen's if injuries occur).**

THE CHOICE OF LIVESTOCK PROFESSIONALS

“When handling stud sheep, your facilities need to be strong and be designed to maximise stock flow.

ProWay’s product is first rate and I can’t fault the design. I would recommend ProWay to anyone wanting new yards or a shearing shed.”

Simon Male - ‘Aberdeen Poll
Dorset Stud’ - Henty NSW

1300 655 383
www.proway.com.au

ProWay products and facilities are proudly Australian designed and manufactured.

CATTLE YARDS - SHEEP YARDS - SHEARING SHEDS - HANDLING EQUIPMENT

Birth Weight (BWT) - Estimates the genetic difference in weight between animals at birth. Birth weight is aiming to reduce lambing trouble in lamb production. Remember that the target should be low birth weight animals without excessive shoulders.

Post Weaning Weight (PWWT) - Estimates the genetic difference in live weight between animals at 225 days of age (7 months). An important trait for producers who wean their lambs and finish between 4-6 months. Aberdeen prides itself in being the leading Stud in the country for this particular trait (growth).

Fat Depth (PFAT) - A more negative ASBV means a genetically leaner animal.

Eye Muscle Depth (PEMD) - Estimates the genetic difference in eye muscle depth at the C site in a 45kg live weight animal. Important for producers targeting 22-26kg (dressed weight) lambs to increase muscle (increased yield).

Carcase Plus - This index puts 60% emphasis on increasing growth, 20% on decreasing fat and 20% on increased eye muscle depth. This index is optimising the three production traits in one figure. The higher the better.

Terminal Carcase Production (TCP) index - *(Replacement for Carcase Plus in March 2020)*. The TCP index has been created to assist producers to achieve both gains in their major production traits, such as post-weaning weight and muscling, as well as ensuring consumer satisfaction from lamb is maintained through focusing on key eating quality traits such as shear force (tenderness) and intramuscular fat (marbling).

ABERDEEN HISTORY

The Aberdeen Stud has been breeding Dorset Sheep for 79 years. The Stud was founded with a Dorset Horn background in 1940 by HC Yates and Sons. In 1975 the stud purchased the entire “Parack” Stud Flock No. 788 and transferred top Dorset Horn ewes from their Horn Stud.

In 2006, Aberdeen Poll Dorset Stud had a new direction under its new location and management. We endeavour to keep breeding sires of true characteristics. Some of these traits involve extremely high growth rate, plenty of style, robustness, clean points and focus on good length of carcass to produce a higher yielding lamb. Now with Lambplan, we can give independently measured figures for birth weight, growth rate, fat cover and eye muscle. Our figures are a highlight and so are the rams.

Aberdeen is still very commercially orientated with clean faces, finer fronts for lambing ease and plenty of body for weight gain. As owners we have a passion to take the Aberdeen Stud to meet our high expectations and goals to promote the Stud to the highest level achievable. Aberdeen will continue to work on meeting the needs of its clients and will purchase sires from other leading studs which have genetically outstanding lambplan figures.

MEMO OF SIRES REPRESENTED IN THIS CATALOGUE

- Aberdeen 5-15** Aberdeen's Super Sire with the highest growth rates in the country. Meaty Ram.
- Aberdeen 152-15** Son of Hillcroft Farms 156-13. Extremely good ASBV's. Top Ram.
- Aberdeen 520-15** Son of Hillcroft Farms 156-13. Displays plenty of length and is extremely solid.
- Aberdeen 527-16** Tall, long ram. Proven sire throughout many studs in the country.
- Aberdeen 679-16** Extreme muscled ram. Another proven sire throughout the country.
- Aberdeen 766-14** Progeny from this ram has consistently thrown great figures across most traits.
- Derrynock 2-16** Good muscled ram with well balanced figures. Happy with progeny.
- North Ulandi 23-15** Purchased privately as a ram lamb. Good muscle and structurally sound.
- Ulandi Park 257-16** Extremely well balanced ram that we used in an AI Program.
- Valma 97-15** Purchased for \$25,900 for his performance figures.

Top 1%	Top 5%	Top 10%
Yellow	Orange	Blue

This year we will highlight the trait leaders in the sale catalogue. We are choosing to highlight the top traits within the country for ASBV's using the colour chart above. Any trait in the top 1% will be highlighted yellow, top 5% orange and to be consistent with the Sheep Genetics website, rams with traits in the top 10% in the country will be highlighted blue.
